August 2025 – Artiste – Zi iacchos

Zi Iacchos presents ***Ornaments***, an album suspended between breath and disappearance, between ritual and silence. Each sound is a sonic ornament placed gently upon the void.

Released on **August 1st, 2025**, ***Ornaments*** blends folk, modular synth textures, detuned guitar in 432 Hz, and whispered vocals, weaving sonic traces that mirror inner alchemy. Rooted in **Taoist Neidan**, the album evokes the timeless space between transformation and stillness. **Field recordings**, organic drones, and contemplative breath structures form the architecture of these pieces. The sound flows like a silent ceremony, where presence, fragility, and vibration meet.

About the artist:

Zi Iacchos is the new name of French-European artist **Kentin Jivek**, known for crafting spiritual and poetic soundscapes using guitar, modular synthesis, and voice. His compositions are inner journeys, fragile, luminous, and steeped in esoteric tradition.
